

DDR Battery Recycling Containers

Damaged, defective, and recalled batteries need to be stored and shipped separate from intact/non-damaged batteries. It's the shippers responsibility to ensure that they are in compliance with any laws and regulations in their jurisdiction. Environmental 360 Solutions (E360S) has partnered with the Canadian Energy Safety and Training Council (CESAT) to offer compliant storage and shipping solutions for DDR lithium and lithium-ion batteries.

CESAT is a non-profit organization that provides extensive training and research for front-line workers and first responders in the clean energy sector. CESAT is also the Canadian distributor of CellBlock fire suppression products, specifically engineered to suppress thermal activity from lithium-ion batteries.

5 Gallon DDR Battery Bucket Kit

The UN Mark 1A2/X28/S/**/USA/M6484 holds up to 11 pounds (5 kilograms) of damaged, defective, or recalled (DDR) batteries.

- P911 and P908 certified
- Regulatory maximum (per battery/cell): 300 Wh/60Wh for cells

Kit Includes

- UN rated PG1 steel pail
- 10 anti-static bags
- 10 lbs CellBlockEX fire-suppressant
- Shipping overpack box
- Regulatory labels/marks
- Instructions

Courier Return Kit

- Outbound shipping 
- Return shipping 
- Processing 

* Customers can also purchase the 5 gallon kit without shipping and processing for \$248.75

\$385.75

30 and 55 Gallon Lined CellBlock Drums

The safest and most cost effective solution for damaged, defective, or recalled (DDR) batteries over 300 Wh. P911 and P908 certified.

30 Gallon Drum

- Interior Dimensions:
- 29.5" depth x 15.6" dia
- 74.9 cm depth x 39.6 cm dia
- UN Mark: 1A2/X235/S/**/USA/M6484
- Tare Weight: 47.5 lbs | 21.5 kg
- Max Gross Weight*: 518lbs|235kg

\$1,123.75

55 Gallon Drum

- Interior Dimensions
- 33.5" h x 18.5" dia
- 85 cm depth x 47 cm dia
- UN Mark: 1A2/X300/S/**/USA/M6484
- Tare Weight: 96 lbs | 43.5 kg
- Max Gross Weight*: 661lbs|300kg

\$1,248.75

*Allowed total weight of package and contents
