

# 5X more batteries

Municipalities that provide curbside battery collection capture 300-600% more batteries per year than they did before.

Curbside collection does not impact other collection streams. In fact, it's all new tonnage that would have otherwise ended up in your local landfill.

Environmental 360 Solutions (E360S) was independently audited and verified under the CSA Group Guideline - CSA SPE-890-15 to have a recycling efficiency rate (RER) of 84%.

The E360S 5000 was specifically designed to recycle alkaline batteries.

# 5X

## more diversion

Improper disposal of lithium-ion batteries is responsible for 50% of MRF and waste vehicle fires in Canada and the US.

Take charge of when and how you receive battery waste from the public to reduce the associated risks.
